Workshop 2

Student User Guide

LLM Top 10 – PromptMe

- *Aakash K*

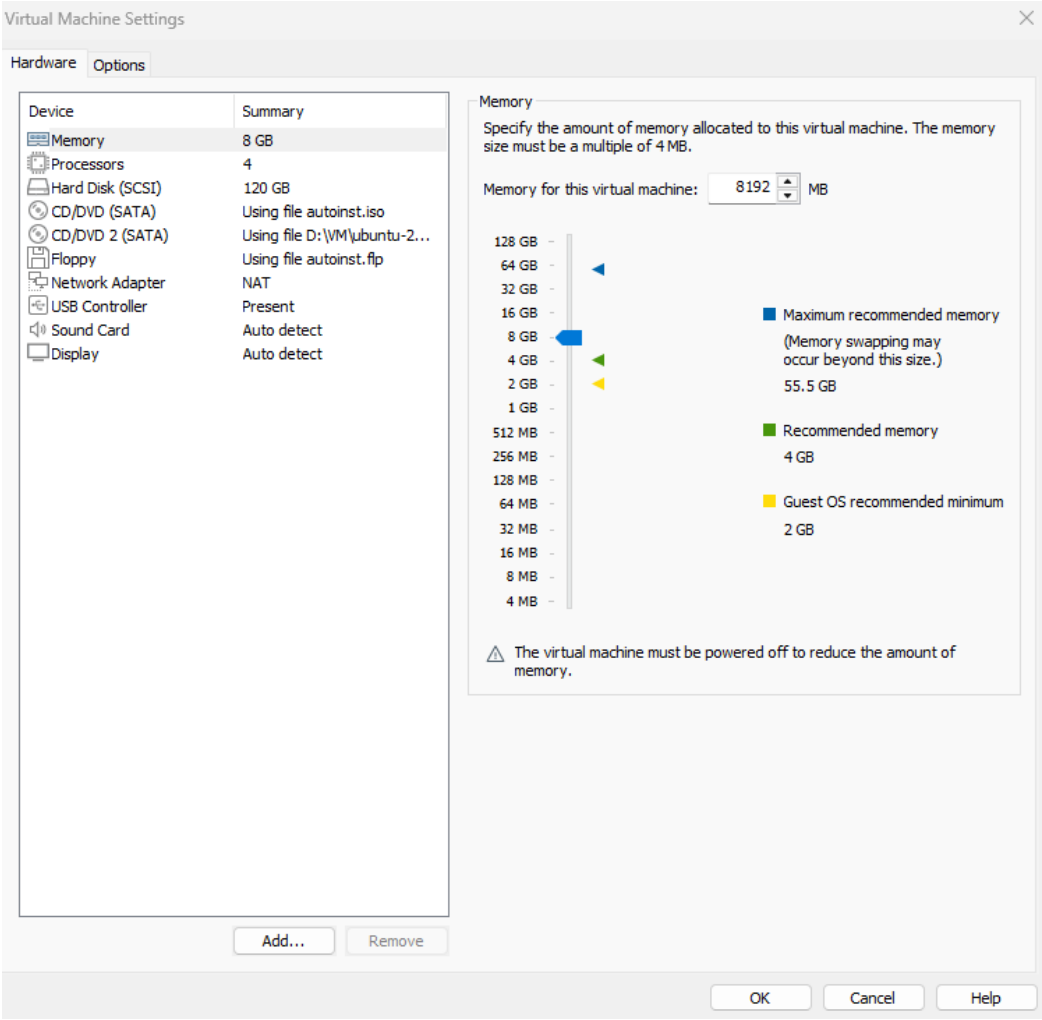
- Download the VMware or Virtual box application.

- Download the VM from this link

- Password : `U2srUR2jrBoeqZ0u4QHE`

Step 1: VM Settings - Allocate Memory

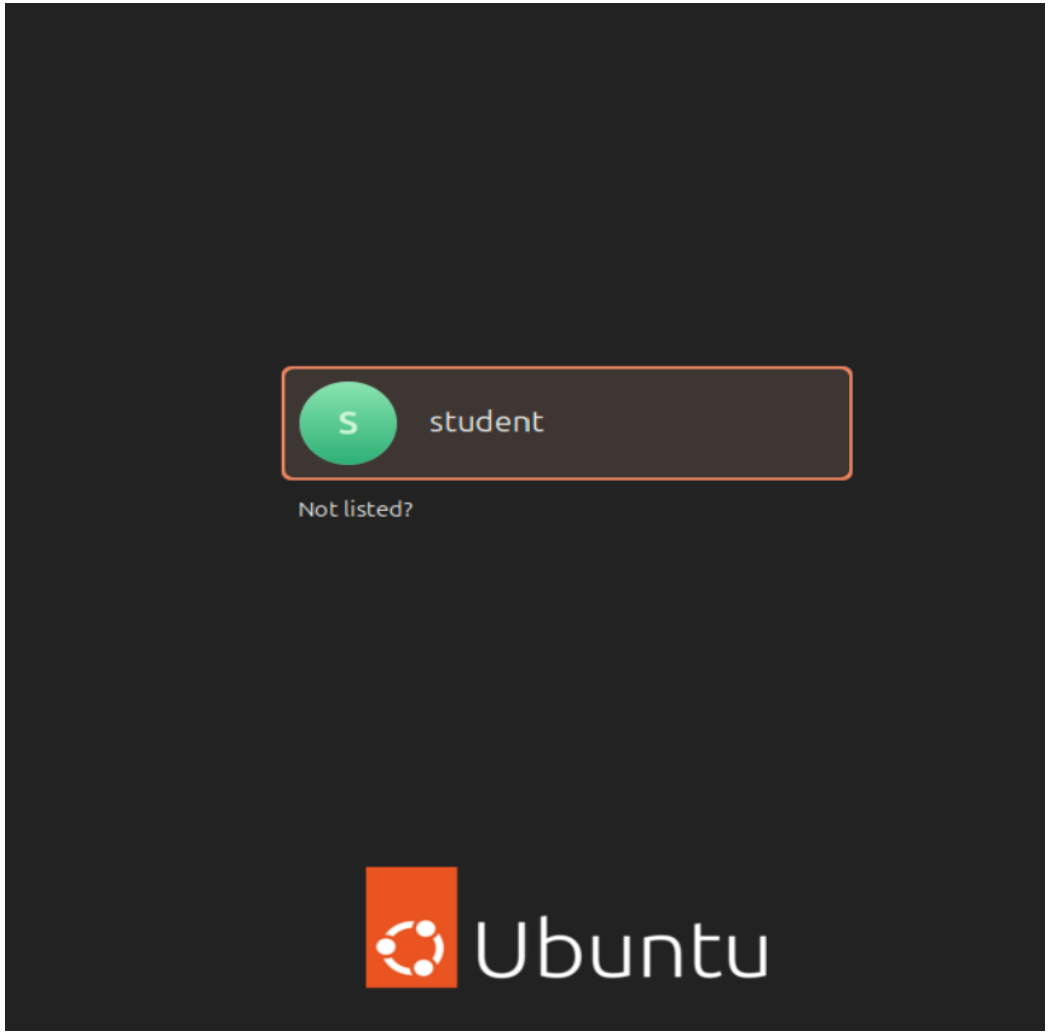
- Open your Virtual Machine settings.
- Go to Hardware
- Set Memory for this virtual machine as per your `computers capacity (8 GB recommended)`
- Set Processors for this virtual machine as per your `computers capacity (4 recommended)`
- Modify this as per your computer capacity



Step 2: Login - Select User

- When the Ubuntu login screen appears, select the user:
  `student`

- Click on the student account to proceed to the password prompt.



Step 3: Login - Enter Password

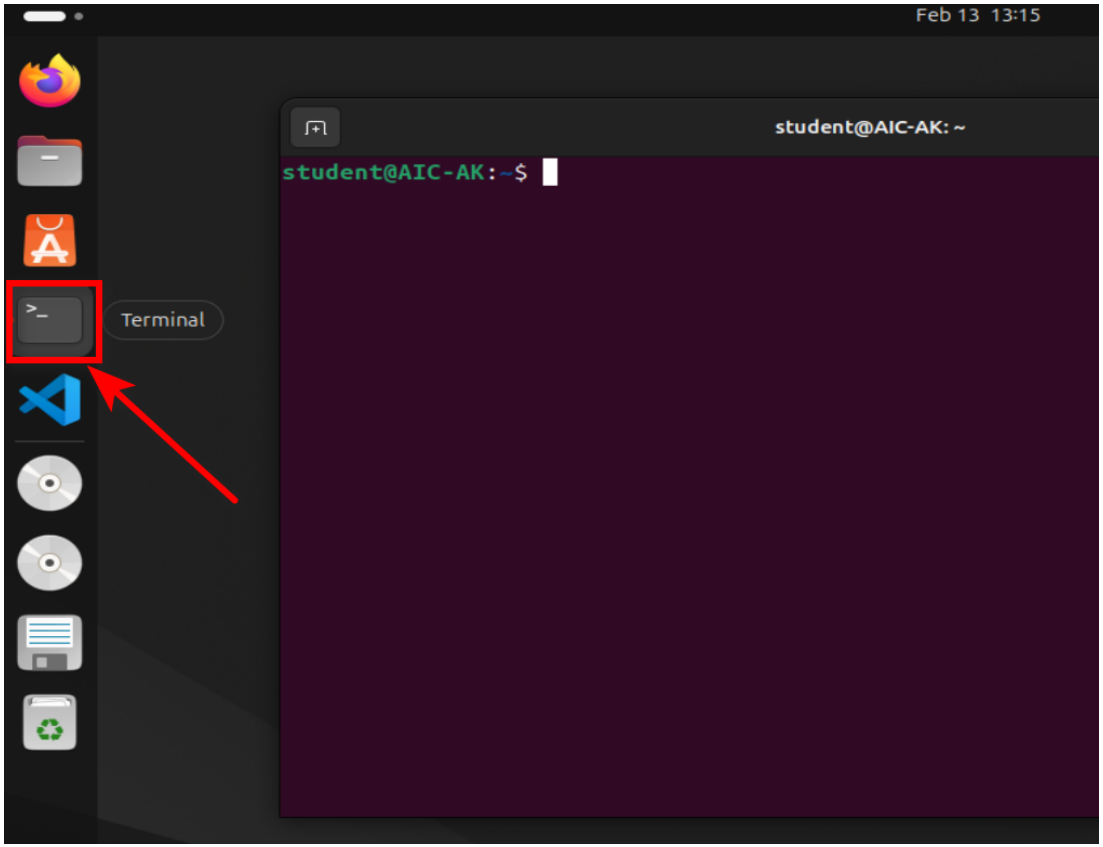
- Enter the password for student.

Password: `nusiss2026`

- Press Enter to log in.

Step 4: Start App - Open Terminal

- After login, open the Terminal (left dock).
- You should see a prompt similar to this =>

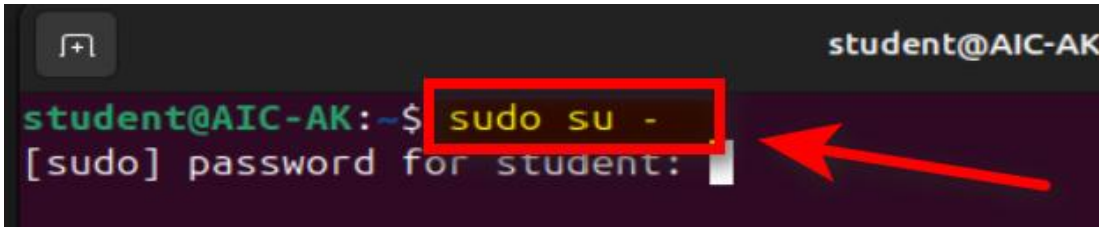


Step 5: Start App - Switch to Root (sudo)

- In the terminal, run the command below to switch to root.

```
sudo su -
```

- When prompted, type the sudo password for student.
- Sudo password: `nusiss2026`

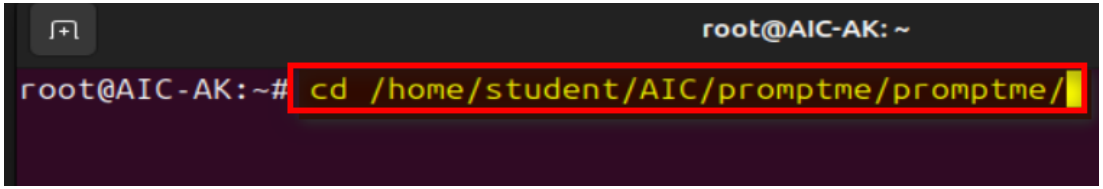


Step 6: Start App - Go to the PromptMe Folder

- Change directory to the PromptMe project folder using:

Command:

```
cd /home/student/AIC/promptme/promptme/
```



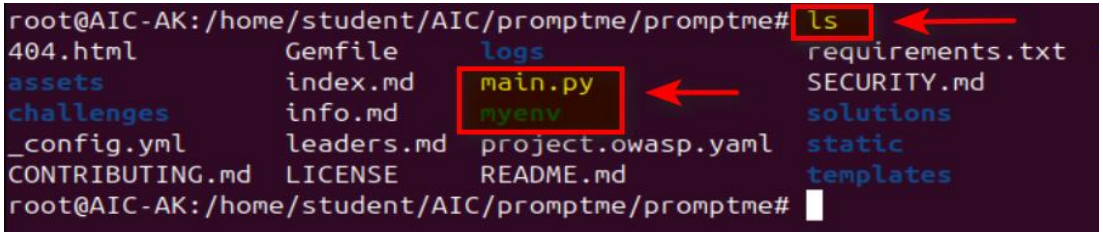
Step 7: Start App - Verify Files (ls)

- List the directory contents to confirm you are in the right place:

Command:

```
ls
```

- You shall see `main.py` and `myenv` files there.

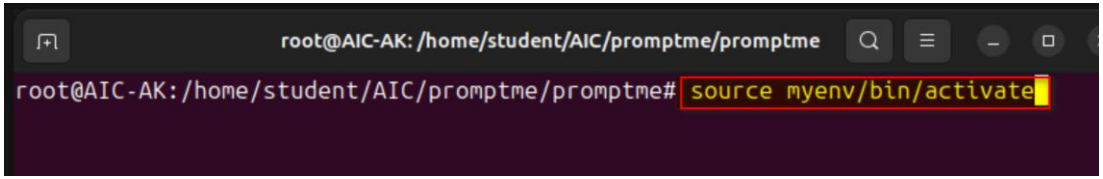


Step 8: Start App - Activate Virtual Environment

- Activate the Python virtual environment:

Command:

```
source myenv/bin/activate
```

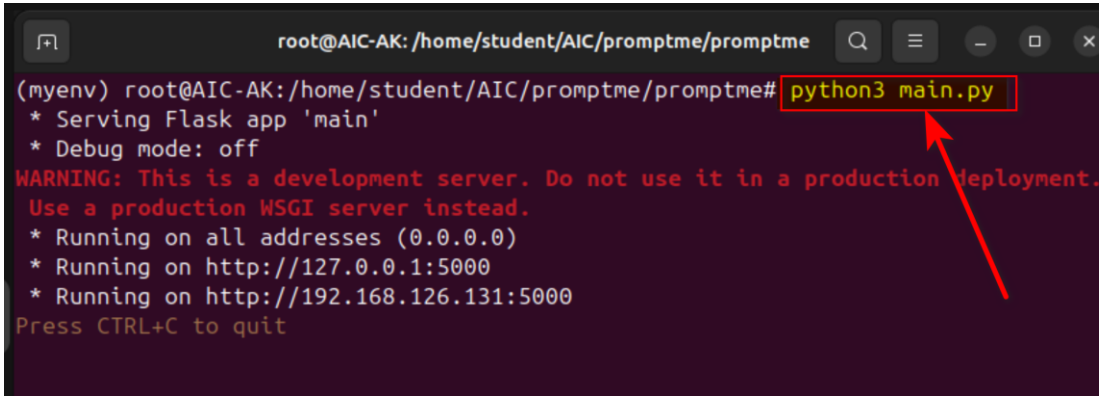


Step 9: Start App - Run the Flask App

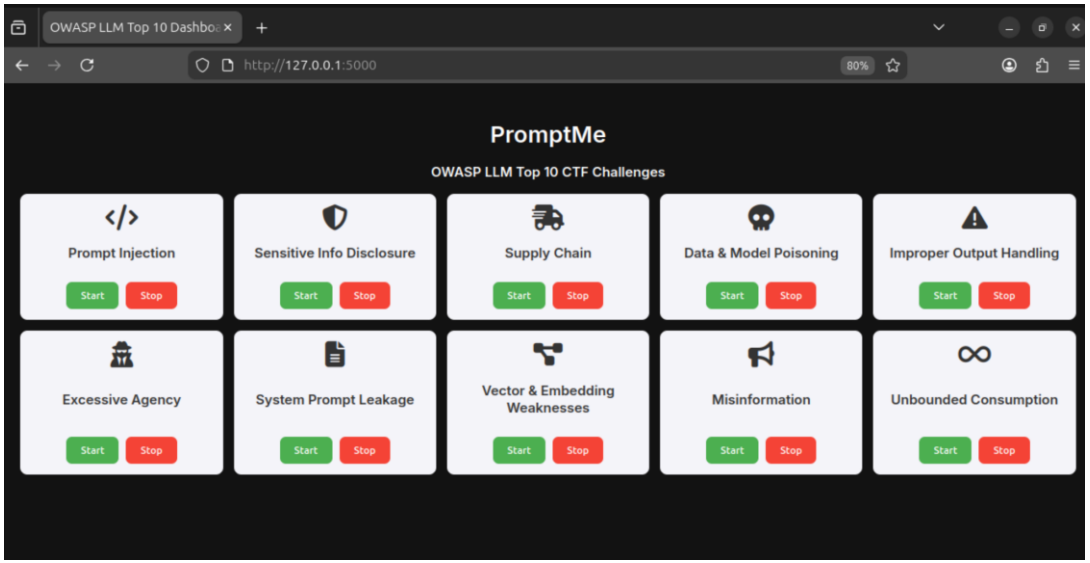
- Start the application:
- Keep this terminal window open. You should see messages showing it is running on port 5000 (127.0.0.1:5000).

Command:

```
python3 main.py
```



Step 10: Start App –

Open the Dashboard in Browser


- Open Firefox (or any browser in the VM).
- Go to: http://127.0.0.1:5000
- You should see the
- PromptMe –
- OWASP LLM Top 10 CTF Challenges dashboard.
